

Key Findings

Data: 78 participants (49 IBS, 29 HC)
42 features (morphometry + cognition)

Network: 78 nodes, 469 edges
4 communities detected

Validation:
ARI = 0.011 [-0.016, 0.102]
Permutation p = 0.212

Robustness:
Consistent across similarity measures
Stable network topology under perturbation
